

# BusinessConnect

Viacloud BusinessConnect allows you to choose a number in Bahrain to forward calls to your international offices. You can also offer your customers local numbers in more than 100 countries in the world to connect to your office. Expand your Business in other countries without an office.

## Key Benefits

- Quick Setup
- No Long Term Contracts
- Flexible Capacity
- Free Trial
- Premium Quality Calls
- Nice Numbers Available
- No Internet Required

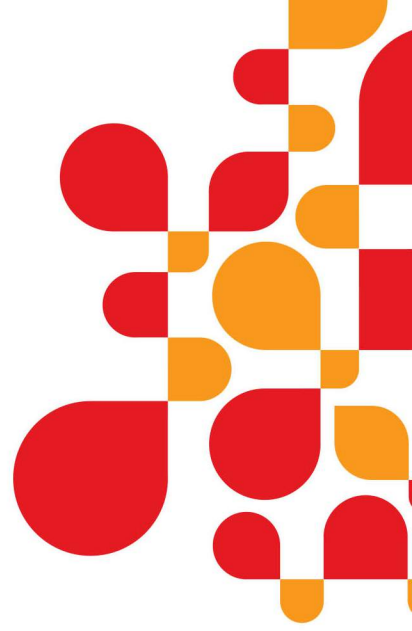

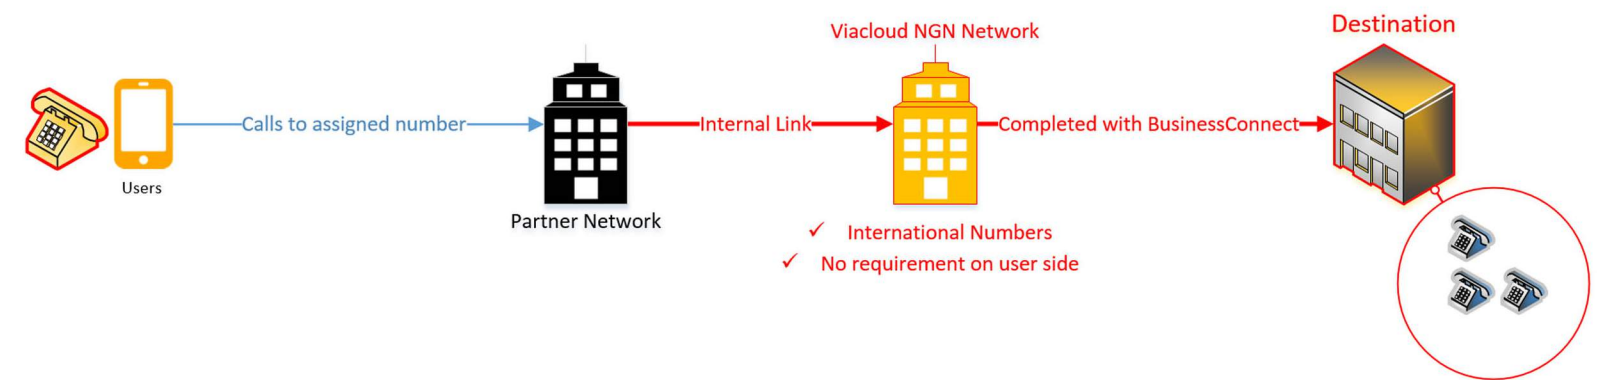

# BusinessConnect

## How does it work?

Viacloud BusinessConnect is a number translation service. By signing up for this service, we register your local / international number in our system and activate your account.

Once the number is activated, any calls made to that number are diverted to your chosen destination either locally or internationally. This service is provisioned in coordination with our international partners in various countries and does not need any lines or changes on your office network.

Connect your Business
