BusinessDirect

How does it work?

Viacloud BusinessDirect is a Carrier Pre-Select service (CPS). By signing up for this service, we inform your service provider that you have chosen Viacloud as the selected operator to make calls.

Once the service is activated, all calls made from your phone lines are sent from your current operator to Viacloud, and are delivered to the destination over our Next Generation Network (NGN).

Below illustration shows how the service is deployed transparently.
