

BusinessSIP

BusinessSIP is an IP based Telephony Service that can support a large number of Voice channels over a single link. Viacloud offers SIP Trunk Services that allow enterprises to simplify their telephony network and reduce their costs significantly. BusinessSIP allows you to have IP based voice Trunks for communicating anywhere in Bahrain and the world.

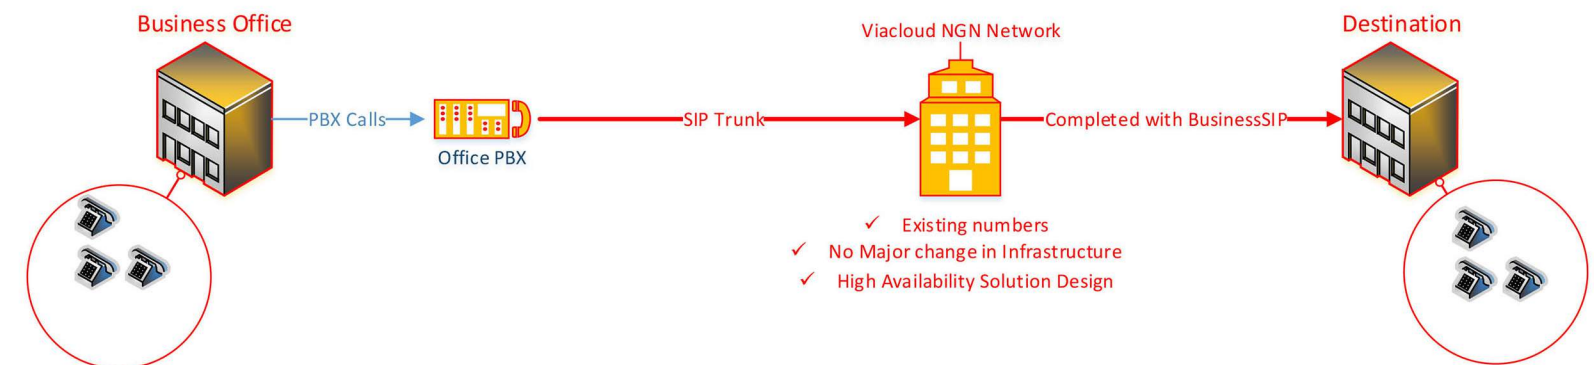

Key Benefits

- Free Setup
- Minimum Monthly Rental
- Free Porting
- Minor Change In Infrastructure
- Premium Quality
- Save on Local & International Calls
- Save upto 50% on bills

BusinessSIP

How does it work?

Viacloud BusinessSIP is a premium business communication service. When you sign up for this service, our team will establish a link to your office PBX system using the SIP protocol. Viacloud uses carrier grade network equipment to ensure the quality and performance of the service is equal to or better than traditional phone lines. Once the service is activated, all calls made from your phones are sent using the SIP Trunk to Viacloud, and are delivered to the destination over our Next Generation Network (NGN).
