

# BusinessMPLS

Viacloud BusinessMPLS is ideal for running mission critical service applications and supporting large numbers of users. As this link is not shared between users, it provides your Business with an internet or data connection that is reliable, secure and dependable. We can provide connections up to 1Gbps, which is the fastest in Bahrain. With BusinessMPLS, you can enhance your business' efficiency and increase productivity multi-fold.

## Key Benefits

- Delivery on Fiber
- High Availability Design
- Secure Connection
- Multiple IP Address
- Save upto 50% on bills

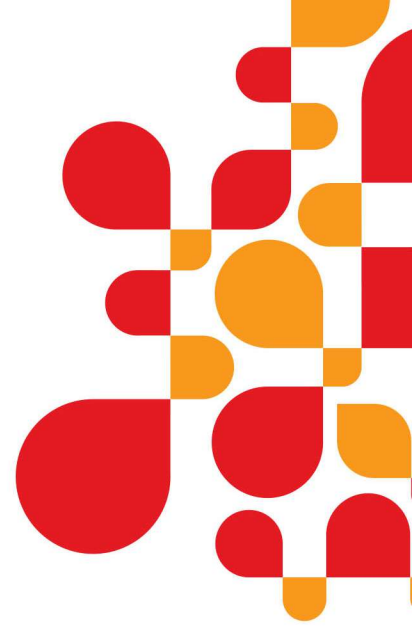

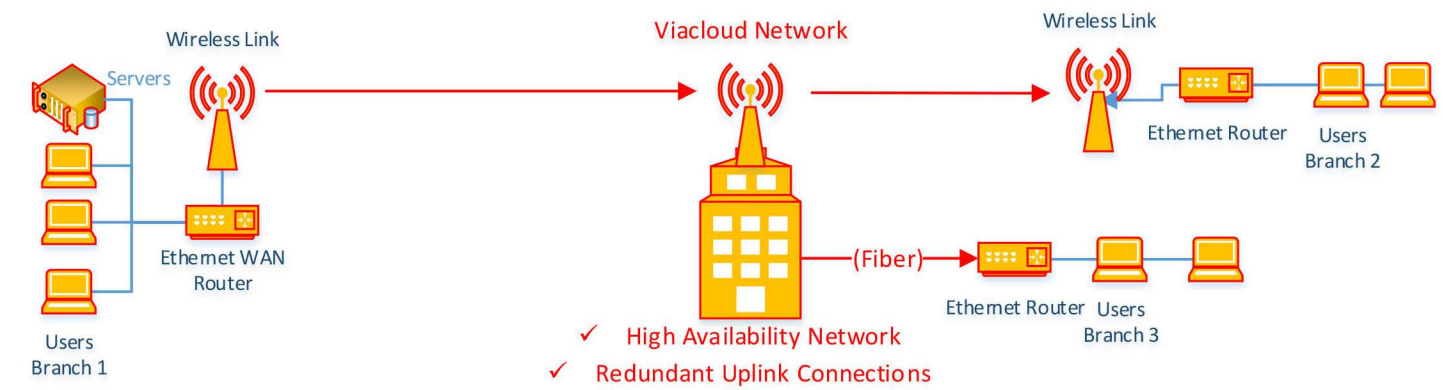

# BusinessMPLS

## How does it work?

Viacloud BusinessMPLS is a Leased Line based access service. We work with Batelco to deliver high bandwidth fiber links from our data center to your offices.

Once the links are in place, we then provision the required VLAN IDs to activate your service. The service is provided as an ethernet based WAN connection and connects to your WAN router and is usually deployed on Layer 3.

Below illustration shows how the service is deployed transparently:

Connect your Business
